*The peonies are ten year old, field-run plants that are not divided after lifting providing a fuller, more established look in the first year. Peonies are the quintessential heirloom plant often still blooming 50 years after original planting. These peonies are prolific life bloomers, producing 20 or more flowers per plant. Nothing compares to a peony - huge flowers, up to 6 inches across, on strong stems with lush green foliage. A cut flower without comparison, they are also beautiful in the border as a centerpiece. When planting in areas with partial shade, staking may be necessary for support once blooming begins.
